TRIPOLI POWDER

(ROTTENSTONE) - Air Float Cream - Super fine abrasive powder

Superior quality polishing products. Proudly made in Australia by an Aussie Woodworker for Woodworkers of Australia and the world

TRIPOLI POWDER Air Float Cream is a super fine abrasive powder used in French Polishing to impart a brilliant sheen to the final finish. Use it over SHELLAWAX & SHELLAWAX CREAM to give a dryer shine to the finish. It can also be used prior to applying a finish

HINTS FOR USING TRIPOLI POWDER

Use on woodturning prior to applying Shellawax for a brilliant finish. - Sand up to 1200 grit. abrasive, dip a clean soft rag into Traditional Wax then into the TRIPOLI work the surface of the turning with the lathe running until the desired finish is achieved, then apply the Shellawax as per instructions.

On turning after applying Shellawax to give a brilliant dry shine. -

Dip a clean soft rag into Traditional Wax then into the TRIPOLI, work the surface of the turning with the lathe running until the desired finish is achieved. Can also be applied dry with out the wax if required or use paraffin oil as a lubricant Dry the surface after application to remove any residual traces of the Tripoli Powder.

Use over French Polish for a brilliant blemish free sheen. - Dust the

polished surface with the TRIPOLI POWDER and with a clean soft rag firmly rub the powder over the work until the desired effect is achieved. Clean off with a clean rag and if desired go over the whole surface with our Polish Reviver to help protect it from heat & water marks, etc. and to remove any residual traces of the TRIPOLI.

Can also be applied with a soft rag that has been moistened with paraffin oil or water to help lubricate the surface of the polish and make the work go easier.

Use TRIPOLI POWDER over almost any finish for surprising and extremely pleasing results.
