

DATA SHEET NUMBER 2

POLISH REVIVER

Superior quality polishing products. Proudly made in Australia by an Aussie Woodworker for Woodworkers of Australia and the world

There are available on the market, a wide variety of furniture polishes. Most of these will have either wax or oil as a base and may be in the form of a cream, a liquid or an aerosol pack.

The effectiveness of many of these polishes is due more to the addition of silicone to the formula, rather than the composition of the product itself.

Most self respecting trades-people would not think of using any of these products but will instead opt for their own special formula polish to freshen up and revive furniture.

Our Polish Reviver is one of these special formulas made from a recipe over one hundred years old, & containing a special blend of secret ingredients which include pure cider vinegar and linseed oil.

WHAT CAN IT DO FOR ME?

Polish Reviver will melt away old layers of built-up wax and oil, etc. from most furniture, taking with it discolouration from smoke, dust, grime, etc. and leaving the surface like new. It is also very effective as a general cleaner for most white goods.

Polish Reviver will nourish, protect and enhance the polished surface, giving most furniture a depth & clarity not seen since it was originally polished.

In most instances It will remove water marks from polished surfaces, hide scratches, & remove or dramatically fade white heat rings, etc. on French polished and lacquered surfaces.

HOW DO I KNOW IF I NEED TO USE A POLISH REVIVER ON MY FURNITURE?

Lightly scratch the surface of the furniture with your fingernail: If it removes some wax. **You need it!** If the surface feels sticky or rubbery. **You need it!** If the surface is water marked, or has white rings. **You need it!** If the surface is dull, dry, faded or is scratched. **You need it!**

INSTRUCTIONS FOR USE:

To use Polish Reviver first shake the bottle vigorously, then pour enough polish onto a clean soft cloth to dampen it. Apply evenly to the piece of furniture and buff off immediately with another clean soft rag. Second and subsequent coats may be needed for heavily waxed or oiled furniture. Very dirty furniture may need to be washed down

with warm water containing a mild detergent before using Polish Reviver.

For old, dry, cracked and crazed surfaces, in poor condition, apply with fine 0000 steel wool, making sure to work with the grain. Don't be afraid to use a little elbow grease, after all the surface is already damaged almost beyond repair so work it with the reviver and see what you come up with.

You may save the expense and hassle of a full restoration job.

FOR USE IN FRENCH POLISHING AND RESTORATION:

Polish Reviver can also be used as a final finish when French polishing new or restored work. If you are looking for a brilliant shine allow the surface to dry hard for a few days. Cut the polish lightly with a water rubbing compound, buff off with a clean soft rag then polish the surface with Polish Reviver. This will not only bring up a brilliant shine, but will also help to protect the surface from water marking, etc. in the future.

FOR WOODTURNERS: Can be used over Shella-wax as a water, alcohol and hear retardant.

WARNING

NEVER LEAVE THE MOIST RAG OR THE OPEN BOTTLE SITTING ON THE SURFACE OF THE WORK This may result in faded polish that cannot easily be repaired.

**ALWAYS SHAKE BOTTLE VIGOROUSLY BEFORE APPLYING REVIVER TO YOUR RAG.
(SHOULD BE A UNIFORM YELLOW COLOUR)**

CAUTION - FLAMMABLE

Contains: Methylated Spirits, turpentine & linseed oil. Keep away from children and naked flames. If swallowed seek immediate medical advice.
