

# EXCLUSIVE SELECTION SANDING DISKS

VELCRO BACK DISKS FOR THE ORIGINAL, U-BEAUT ROTARY SANDER and other Velcro faced, 75mm (3") sanding heads

---

We are pleased to announce our **Exclusive Selection** range of abrasive disks for the Rotary Sander and all other 75mm, Velcro faced sanding heads.

These disks are exclusively selected for their ability to outlast the other grits offered for sale. In our demonstrations we have found that our 80 and 120 grit (Astra Single Dot abrasive) will outlast at least 6 disks of regular abrasive while our 400 grit (Astra Double dot abrasive) has more life in it than a regular 120 grit.

All grades 80, 120, 180, (single Dot) 240, 320, 400, (Double Dot) 600, 800, 1200 and 1500 (Magnum - Formally Champagne) all have the ability to last at least 2 times longer and up to 20 times longer than all other brands we have tried. Making them really good value for money.

These are by far the best abrasives we have come across in the past 20 years. And we highly recommend them to anyone using the **Original U-Beaut Rotary Sander**. We now use nothing else and are consistently getting at least 3 to 4 times more life out of these disks.

## **ASTRA SINGLE DOT**

Astra Single Dot Abrasive made by Noretake Coated Abrasives is without a doubt the longest lasting best cutting abrasive on the market today. Our tests have it outlasting at least 5 regular disks of the same grit. Available in 80, 120 & 180 grits

## **ASTRA DOUBLE DOT**

Astra Double Dot Abrasive made by Noretake Coated Abrasives has the same long lasting capabilities as the Single dot. In tests we found the it outlasted at least 6 regular disks of the same grits. Available in 240, 320 & 400 grits

## **MAGNUM ABRASIVE**

Magnum is sandpaper technology at its finest. We have found it cuts faster, runs cooler, resists loading better and last longer than any conventional sandpaper. With the exception of the Astra. Available in 600, 800, 1200 and 1500 grits.
